PROFESSIONAL SUMMARY

Full Stack Engineer skilled in web and mobile development, data science, and AI. Expert in crafting end-to-end solutions for diverse projects.

WORK EXPERIENCE (2+ years)

GRADLY INC. – Software Engineer; Remote

Feb 2023 – Present

- Collaborated within a team to develop a chatbot powered by LLMs, which led to a reduction in response time, increased customer retention, and the provision of accurate responses to complex customer queries.
- Developed numerous internal tools for the company, including an end-to-end dashboard that facilitates tracking payments, sales, and streamlining various operational processes.
- Implemented new features in the Gradly web app that resulted in increase in user engagement and decrease in bounce rate.
- Developed Gradly mobile app using Flutter, implementing key features and functionalities with reference to the Gradly web app.

GRADLY INC. – Independent Contractor; Remote

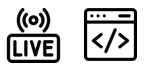

July 2021 – Jan 2023

- Automated claims processing, email workflows, and other processes, boosting customer retention and streamlining operations.
- Developed cron jobs and periodic scrapers using Firebase Cloud Functions, enhancing data collection and management processes.

PROJECTS

CHAT-WITH-PDF

Tech Stack – LLMs, Langchain, OpenAI, Node.js, NPM

- Developed an npm package enabling command-line interactions with PDF documents through a chat interface powered by LLMs.

CONFESSION

Tech Stack – React, Redux, Firebase, Chat API

- Developed a college-focused social media app for anonymous and authentic sharing of confessions. Features minimalistic UI, chat app and toxic comment detection.

BLOG

Tech Stack – Next.js, React, Typescript, Tailwind CSS, LLMs, Notion

- Developed personal blog website with Notion as CMS, powered by LLMs. Features blog summarization and Q&A feature for interactivity.
